2015 4th Global Conference
on Economic Geography
mapping economies in transformation
Oxford University, United Kingdom

fourth global conference on economic geography 2015

mapping economies in transformation

The School of Geography and the Environment at the University of Oxford invites geographers, regional scientists, policy makers and researchers of related disciplines to participate in the Fourth Global Conference on Economic Geography to be held in Oxford on 19-22 August, 2015.

The overarching theme of the Oxford Conference is Mapping Economies in Transformation, recognising that the world is undergoing a transformation in terms of technology, and in need of transformations in terms of social and environmental sustainability
